

## **ABOUT CITY INTERNATIONAL HOSPITAL, HO CHI MINH CITY**

The City International Hospital is a 320-bed tertiary care multi-specialty hospital based at the Hi-Tech Healthcare Park in Ho Chi Minh City, the economic centre of Vietnam. In December 2010, Gleneagles Management Services Pte Ltd and Hoa Lam-Shangri-La Healthcare Limited Liability Company signed a consultancy and hospital management services agreement providing advisory, administrative, management and consultancy services to the hospital. Featuring the latest medical technology, imaging equipment and extensive facilities, City International Hospital delivers quality healthcare and holistic patient experience to the population of Ho Chi Minh City and Mekong Delta. Located at the Binh Tan District and south western side of the city, the hospital is easily accessible via the Highway 1A, East West Highway, Nguyen Van Linh Road.

The hospital is targeted to open in first quarter of 2013.

### **THE CONCEPT**

City International Hospital is the first premier international hospital developed in a fully integrated healthcare environment, a Hi-Tech Healthcare Park that incorporates healthcare, education, research, residential and commercial components and provides a secured, gated and guarded environment for patients and medical professionals. The project is developed by Hoa Lam-Shangri-La Healthcare Limited Liability Company with Ireka Development Management Sdn Bhd appointed as the exclusive Development Manager. Approved by the Department of Planning and Investment and supported by the People's Committee of Ho Chi Minh City, Parkway, being one of the key players in the development and operation of the international medical facilities will participate in the design, development and management of the hospital upon its completion in accordance with international standards of hospital administration and management.

### **THE DESIGN**

The hospital is designed by Perunding Alam Bina Sdn Bhd, a Malaysian practice which had won Awards for Excellence in Architecture and has vast experience in hospital planning and design. The optimum building design and planning solution fulfill aesthetic considerations, functional requirements for efficient operations and patient focused, providing a warm, comfortable hotel-like feel with a relaxing, healing environment for patients and visitors, and a pleasant working environment for staff.
